Nexavar Support Programs

Helping You With Your Nexavar Therapy
Supporting access to your therapy

If you are reading this, you are either starting Nexavar therapy or already receiving treatment. You may have some questions about insurance coverage or assistance with paying for your therapy. Bayer HealthCare Pharmaceuticals Inc. and Onyx Pharmaceuticals, Inc., seek to provide support to Nexavar patients. This brochure answers some of the frequently asked questions patients may have about these issues.

Q: Who can I contact about insurance questions or payment matters related to my Nexavar treatment?

A: The REACH® (Resources for Expert Assistance and Care Helpline) program at 1.866.NEXAVAR (1.866.639.2827) employs specially trained counselors to help you with insurance and payment matters. REACH counselors can also help to determine if you qualify for various financial assistance programs. You can be enrolled in REACH through your doctor’s office or enroll yourself online at www.nexavar.com.

Q: Is Nexavar covered under my private insurance plan?

A: Nexavar has broad insurance plan coverage. A REACH counselor can contact your insurance company to help determine coverage for your Nexavar therapy.

Q: Is Nexavar covered under my Medicare Part D plan?

A: Nexavar is covered by Medicare Part D plans. Your doctor’s office or a REACH counselor can help determine your coverage.

Q: How can I get Nexavar if I don’t have insurance coverage?

A: The Patient Assistance Program provides eligible patients with a 30-day supply of Nexavar shipped to their home. Patients approved for the program will receive assistance for 1 year, after which they must reapply.
Q: Can I get Nexavar while I’m waiting for my insurance company’s approval?

A: Yes. The Temporary Patient Assistance Program* offers financial help so patients may pay for Nexavar while waiting for insurance approval. In addition, a REACH counselor can contact your insurance company to help with the approval process.

Q: Can I qualify for any financial help through my state?

A: Under the State Pharmaceutical Assistance Programs (SPAPs), prescription coverage and payment assistance may be available for low-income individuals and the disabled. You can ask a REACH counselor to find out information about this program in your state.

Q: Can I get help with my co-pay? I want to stay on my medication.

A: Yes. Patients with private health insurance may be eligible for **NexCCAP (Nexavar Commercial Co-Pay Assistance Program)**. **NexCCAP** may limit the amount of your co-payment for Nexavar therapy. Based on eligibility requirements and income,† patients may have a set co-payment ranging from $0 to $100 per prescription. Call a REACH counselor at **1.866.639.2827** to find out if you are eligible. **NexCCAP** is not for patients with Medicare coverage.

Q: Where can I get help with my Medicare Part D co-pay?

A: REACH can help identify other sources of assistance. These may include referrals to charitable foundations or support groups that can assist with your co-pay or other related medical expenses.

---

Participation in the REACH program is not contingent on future Nexavar purchases.

*This program is not for patients receiving prescription reimbursement under any federal-, state-, or government-funded insurance programs or where prohibited by law. Patients are responsible for reporting co-pay assistance to their insurance company.

†Federal Poverty Level is used to determine eligibility.
Count on us to help you get your Nexavar therapy.
